If you want to add these lessons to your Google Calendar, you can do so by importing these readings' CSV file into your Google Calendar.

[Download the CSV](#)

Importing this CSV will create an all-day event for each reading and show your status for that full day as "busy." If others need to see your actual free-busy status in Google Calendar, you should create a new calendar and import the CSV there rather than into your main calendar. For detailed instructions about creating a new calendar in Google Calendar, please see the Google Calendar help pages.
